Alp Kavaklı 22402450

Each grid is 1/32 in the first photo (for keyboard), I used a 4/16 in the music because I couldn't get it to be 8 measures otherwise (I first recorded it then I made the it fit "8 measures".)

Most of my notes are 1/16 and some are 3/32 as note values. I wanted to use more variety of them but when I tried that, they didn't sound like the melodies are talking, but I wanted to keep that.

I also changed synths settings randomly till It started sounding good but I had no idea what I was doing.

Also the melody ends by returning to its starting note, so it gives a kind of completion vibe but not so much so probably it didn't end in the tonality note.

As contour it isn't moving much but at first it ascends up but like a wave, then it is descends down and then it goes back to where it started. And the motion is mainly stepwise down up down in 1 semitone.

The highest note is in a sharp 4 and lowest is c4. So the range is 10 semitones which is minor 7th.
